# SYSTEM AND METHOD FOR NARROW BAND PLL TUNING

## 5 ABSTRACT OF THE DISCLOSURE

An integrated VCO having an improved tuning range over process and temperature variations. There is therefore provided in a present embodiment of the invention an integrated VCO. The VCO comprises, a substrate, a VCO tuning control circuit  
10 responsive to a VCO state variable that is disposed upon the substrate, and a VCO disposed upon the substrate, having a tuning control voltage input falling within a VCO tuning range for adjusting a VCO frequency output, and having its tuning range  
15 adjusted by the tuning control circuit in response to the VCO state variable.
